

Washed animal bedding sand

Shorter wheat & barley has reduced straw yields to 1.6te per acre. This has caused prices to rise by approximately 30-40%, in the last two years, according to the Straw Merchants Association.

** This analysis is based on figures reported from the Straw Merchants Association, allowing 1.5tonnes of straw per cow per annum and 2.25 tonnes of sand per cow per annum.*

Based on a herd of one hundred cows, the use of Washed Animal Bedding Sand could potentially lead to an overall saving of £3,450.00 compared with the use of Wheat Straw.

Other Benefits of Using Washed Animal Bedding Sand

- Reduced dust levels, promoting a healthier environment for both staff and cows.
- Good for soil (PH enhancement).
- Significant reduction in bacteria and viral pathogens, which can cause mastitis and other animal health issues.
- More comfortable for cows to lie down on, increasing rest time.
- Less slippery surface, reported to aid in reducing lameness.
- Exempt from Aggregate Levy.
